Subject —

Transfer of control of internal water supply distribution in Kolar town to the Sanitary Engineering Department

---

SIR

With reference to correspondence ending with my letter dated 4th March 1949 on the subject mentioned above, I have the honour to forward herewith the resolution of the Municipal Council Kolar passed at their meeting held on 2nd April 1949 and to state that the Council are agreeable to continue the present system of distribution under their own management, as the transfer of control over distribution system to the Sanitary Engineering Department involves heavy cost to the Municipality. Therefore the original proposal of the Council recommended in my letter dated 18th February 1948 to hand over distribution system also to the Sanitary Engineering Department may kindly be dropped.

Yours faithfully,

For Deputy Commissioner,
Kolar District.

Letter No AS C L B 150/47-48 Dt 18-2-48 from the Dy Comm, Kolar Dt, requesting that the work of distribution of water in Kolar Town may be entrusted to the management of the Bureau of Sanitary Engineering.

1) The control of the water works at Kolar continues to be under the management of the Bureau of Sanitary Engineering. It is reported that a sum of Rs 14,000/ is being paid by the Mcpl to the Bureau of Sanitary Engineering towards the maintenance charges & that the distribution of water in the Kolar town is being attended to by the Mcpl themselves & that 2 watchmen Peons have been entrusted with the work of regulating the water supply.

2) It is also reported that the present distribution system is not satisfactory. The Mcpl, Kolar have resolved to entrust this work to the Bureau of Sanitary Engineering. The Dy Comm agrees with the Mcpl & recommends the same for sanction

3) The Chief Engineer for Irrigation will perhaps be consulted unofficially in the matter before orders

Office of the Deputy Commissioner, Kolar Dt
Dated, Kolar the 18th February 1948.

To

The Secretary to Government,
Revenue Department,
Bangalore

Sir,

Entrusting the work of distribution of water in Kolar Town to the management of the Bureau of Sanitary Engineering Department

---

I have the honour to state that the maintenance of the Kolar Water Works is at present under the management of the Bureau of Sanitary Engineering and the Municipality is paying every year about Rs 14000/- towards the maintenance charges The distribution of water in the town is however attended to by the municipal council themselves and two untrained peons have been entertained to regulate the water supply

The President, Kolar Town Municipal Council, reports in his letter dated 4-2-48(enclosed in the records) that the present arrangement is by no means satisfactory as this important work requires efficient management and constant attention The services of able workmen and timely technical advice in giving fresh tap connections, laying pipe lines and regulating water supply seem to be absolutely necessary to ensure proper distribution of water Besides, water source now available is insufficient and it cannot meet the entire demand of this growing Headquarters Town and it is therefore very necessary that water is conserved and distribution regulated properly The Municipal Council discussed this subject at their meeting held on 20-1-48 and resolved that Government may be moved to entrust the distribution of water supply to the Department of Sanitary Engineering I agree with the Council and request you kindly to obtain sanction of Government to the resolution of the Municipal Council, Kolar dated 20-1-1948

I have the honour to be,
Sir,
Your most obedient servant,

To

THE DEPUTY COMMISSIONER,
KOLAR DISTRICT,
KOLAR

Regarding - Taking over the distribution of water Supply in Kolar town Municipality to the management of the Bureau of Sanitary Engineering, Bangalore

Sir,

Adverting to Government Order No L 13548-50 M1 49-46-8 dated 7-4-47 sanctioning the continuance of the Kolar water works under the charge of the Bureau of Sanitary Engineering till the end of 1946-47, I have the honour to state, that the Municipal Council at their meeting held on 30-5-47 resolved that the management of the water works may continue to be under the charge of the Sanitary Engineering during the year 1947-48 also and a report has already been submitted in this office letter No O C 422/44-45 dated 13-6-47 requesting to obtain sanction of Government to the resolution of the Municipal Council and orders are awaited

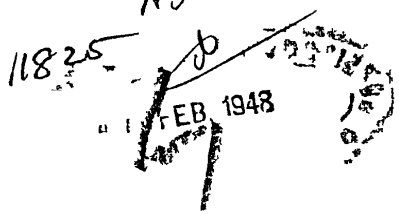
In the meanwhile the Municipal Council at their meeting held on 23-8-47 resolved that the distribution of water supply in the town also be handed over to the control of the Sanitary Engineering Department with effect from 1-1-1948 The Sanitary Engineer who was apprised of the resolution of the council, forwarded a copy of letter No 2861/I dated 17-11-47 from the Chief Engineer for Irrigation in Mysore, Bangalore, stating that orders of Government through the Deputy Commissioner, Kolar District may be obtained in the matter Thereupon this question was placed before the Municipal Council at their meeting held on 20-12-47 and it was resolved that the Deputy Commissioner, Kolar District be requested kindly to address Government in this behalf

At present the distribution of water to this town is under the direct control of this Municipality and two untrained peons have been entertained for regulating water supply There are now 260 public taps and 256 private house connections in this town and there is keen demand for more house connections As connections to public foutains as well as to private taps have been given from main lines without providing submains and controlling valves, water drawn up from the taps located at higher levels and even the public taps in the lower part of the town particularly in Kuruberpet and Gulpet and such areas are not getting adequate supplies of water A overhead tank of 40000 gallons capacity is installed near the water works to store and supply water to this town regularly But the population of the town is 24515 as per census of 1941 and about 2½ lakhs gallons of water is required per day at the rate of 10 gallons of water per capita This entails lot of work and requires efficent management and constant attention by the staff

P T O

The services of efficent work men under the control of expert management like the Sanitary Engineering department are absolutely necessary as this Municipality is experiencing much difficulty in managing the work of distribution of water in addition to the several other commitments. In the interest of the public good I am of opinion that both the maintenance of the water works and the distribution of water supply to this town be transferred to the charge of the Bureau of Sanitary Engineering, Bangalore very advantageusly

I therefore request that the resolution of the Municipal Council at its meeting held on 20-12-47 be very kindly recommended to Government for sanction A copy of the resolution ~~of~~ and a copy of letter from the Chief Engineer for Irrigation are enclosed for kind perusal.



I have the honour to be,
Sir,
